## ITALIAN AIR FORCE

		
<b>SAND</b>	<b>MOTTLE GREEN</b>	<b>OVERALL GREEN</b>
		
<b>UPPER SURFACE GREEN</b>	<b>LIGHT GREEN</b>	<b>TERRA COTTA</b>
		
	<b>GREY</b>	

## RUSSIA, TURKEY, RUMANIA, & HUNGARY

		
<b>RUSSIA GREEN</b>	<b>RUSSIA GREY - GREEN</b>	<b>RUSSIA &amp; TURKEY GREY - VIOLET</b>
		
<b>RUSSIA &amp; TURKEY EARTH BROWN*</b>	<b>RUSSIA SLATE GREY</b>	<b>RUSSIA PALE BLUE</b>
		
<b>TURKEY SLATE GREY</b>	<b>RUMANIA &amp; HUNGARY DARK BROWN*</b>	<b>HUNGARY BLACK BROWN</b>

\* Note: Turkey, Earth Brown was used as a mottle over Luftwaffe Sand on German aircraft operated by Turkey.

\*Note: Rumania, Dark Brown was used in the Black Sea area. German aircraft used in this area sported the standard Luftwaffe desert scheme.

All Soviet & Turkish paints varied in both quality & application also, ground crews were constantly using "homemade" mixes. Although there were variations, the above should be considered the 'standard.'

The most common Soviet camouflage schemes were; Green/Grey-Green upper; Pale blue under. Grey-Green/Earth Brown upper; Pale blue under. Green/Grey-Violet upper; Pale Blue under (S. East & Central). In winter, Soviet aircraft were overpainted with a washable white distemper for snow camouflage.
